SUMMARY

Dedicated and highly motivated Junior Full Stack Developer with a background in Psychology. Experienced in frontend React applications, technical support and quality assurance, alongside three years in social care. Demonstrates excellent time management and multitasking skills in fast-paced environments. Proficient in building cross-platform applications using React, React Native, and web APIs, with a focus on UX/UI design and implementing C# REST API's. A known collaborative team player with excellent communication skills and a strong commitment to continuous professional growth. Seeking an opportunity within a welcoming and supportive organisation where I can contribute to impactful projects while further developing my technical and design abilities.

EXPERIENCE

Junior Software Developer | Stratum | Ballymount Corporate Park, Dublin | November 2025 - Present

- Developed and maintained a functional React Native mobile application within a B2B transport management company, integrating data requests and outputs with a C# backend while implementing interactive user interfaces in line with project requirements.
- Implemented and integrated REST and SOAP APIs for customers migrating to Azure cloud environments, optimising data flow and system performance to improve efficiency.
- Used Git and GitHub for version control, collaborating on code changes through pull requests and participating in code reviews.
- Conducted software testing and debugging using SmartBear, executing unit test cycles for quality assurance to identify defects and improve overall software reliability.
- Developed and maintained customer billing documents using C# and .NET Framework, implementing client-driven features in cooperation with customers and project managers.

Software Support Specialist | Ballymount Corporate Park, Ballymount, Dublin | November 2024 - Present

- Troubleshoot and resolve complex technical issues (network connectivity, SMTP, RDP), ensuring minimal downtime and optimal performance.
- Conduct thorough testing of new code builds in virtual machine environments to maintain system stability and enhance user experience.
- Performed in-depth MSSQL database investigations, resolving discrepancy issues to improve data integrity.
- Delivered user training on product functionality by presenting live demonstrations and hands-on walkthroughs through Microsoft Teams and mobile mirroring tools.
- Used Confluence and Jira to track support tickets, maintain and create documentation, and manage issue resolution workflows in line with organisational procedures.
- Created weekly KPI reports to monitor ticket performance and developed a licence monitoring process to ensure customer access permissions aligned with contractual agreements, collaborating with the Accounts team.

Customer Service Agent / Technical Support | Infosys (Virgin Media) | City West, Dublin | March 2024 - May 2024

- Diagnosed broadband, TV, and phone issues using Pega software.
- Efficiently resolved technical support queries, achieving high customer satisfaction.
- Scheduled and coordinated technician appointments, ensuring timely service.

PROJECT

Country, Weather, and News API App | Atlantic Technological University | May 2024 - July 2024

- Developed a web application using TypeScript, Angular, and Ionic to accurately retrieve and process real-time data on countries, weather, and news.
- Processed and managed data returned from multiple APIs, handling different data formats to ensure accurate information display within the application.
- Developed a GUI to display and organise application data in accordance with project requirements.

Dynamic E-commerce Website Application | Atlantic Technological University | May 2023 - July 2023

- Developed a robust e-commerce application using HTML, CSS, and JavaScript, implementing a user-friendly interface for browsing products.
- Implemented secure user authentication and login functionality to manage customer access and accounts.
- Developed an efficient transaction process to support product purchases and streamline the customer checkout experience.
